Dedication

Sometimes through the halls of any institution there comes a great man--a dedicated man. To our school came such a man only a few years ago, and he has in this short span of time inspired us to seek higher achievements as he endeavored to teach and to counsel for our highest potential.

In appreciation for what he has meant to us as individuals and for what he has meant to our school, we dedicate the 1965 ELBALA to

The Superintendent

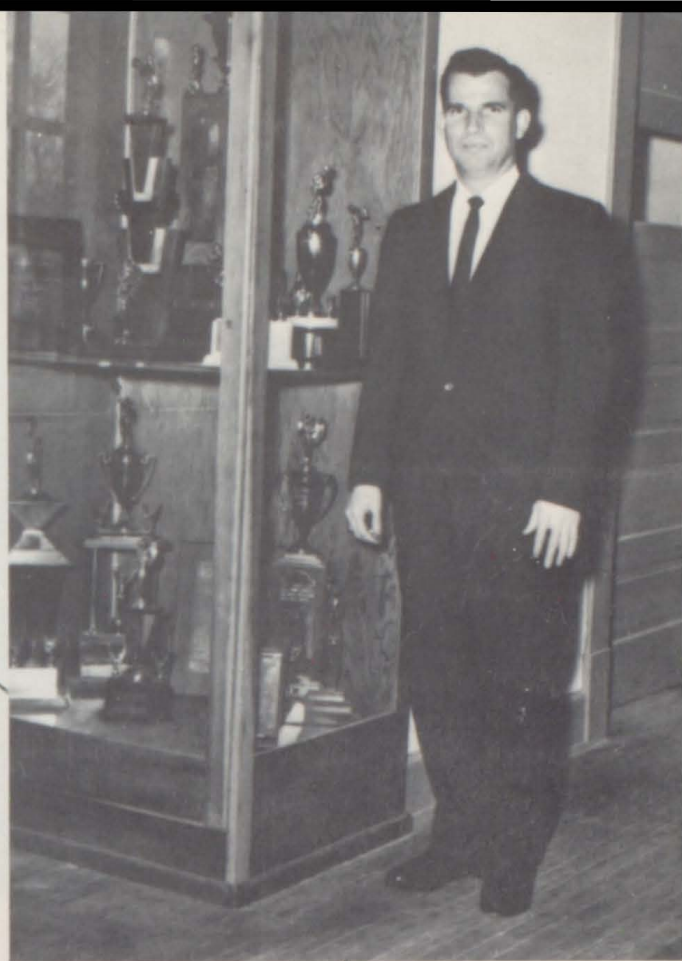

We sometimes take too many things for granted, including freedom, private enterprise, and educational opportunities. Is it possible that we may have to lose some of these precious things before we learn to appreciate them?

In this day and age we are engaged in a battle of the minds. The outcome could determine the duration of our freedom, private enterprise, and educational opportunities.

It is my sincere belief that with the outstanding faculty in the Elba City Schools and the alert student body our students will take advantage of these educational opportunities that prepare them for life.

Elmer Taylor

February 15, 1965

TO THE STUDENTS OF ELBA HIGH:

Each of us this morning looked into a mirror to see if we looked all right. Chances are that each of us made a slight--or maybe not too slight--improvement. We knew the candid cameras of many people would behold us so we tried to look pleasant in order that they might think well of us. The look into the mirror was a minor act of self-criticism. As you travel Life's highway, you should have a continuing act of self-criticism because you are your best teacher.

The business of teaching is to make a winner. We study your possibilities, seek to strengthen your purpose, increase by practice your potentials, help you to know yourself. A good teacher is not trying to make things easy. He is trying to make you effective. The teacher wants you to be fit and to develop habits of good thought and action.

Weaklings criticize and blame others. Strong persons criticize themselves, but they do not become discouraged when they find a weakness. They strive to correct it. As you work and study in our institution, watch yourself and correct yourself. Believe in yourself; expect great things of yourself. Make self-criticism your mental mirror.
